

# Polymer to the rescue – create web applications faster and with ease

Łukasz Janicki – October 2016

- You can simply open the „live” presentation here: <http://polymer.thejavatar.com>
- or check the code here: <http://cern.ch/go/N8LJ>
- or download the examples and run on your computer (see next page).

# Running the examples

- The easiest way to get the examples is to clone the github repository: `git clone https://github.com/thejavatar/polymer-examples.git`
- Later execute `./gradlew build` (*unix/macos*) or `gradlew.bat build` (*win*) – this will download additional dependencies
- Later run: `./gradlew run` or `gradlew.bat run`
- You will find the presentation running under <http://localhost:8000/examples/intro/index.html>
